

KA 230/400
Direct Oilheaters

KA 230/400

The Kongskilde range of direct fired heaters are designed specifically for use in ventilated areas.

Their design, using the latest technology, ensures total reliability.

The heaters are 100% efficient and can run on diesel or kerosene.

The flamecontrol is monitored by a photo cell.

The Kongskilde KA heaters are fully automatic and can be controlled by a thermostat.

The heater has an automatic after-cooling cycle of the combustion chamber.

This provides additional security.

The heaters are supplied with an integrated burner with high pressure fuel atomization.

All models are fitted with large transport wheels for easy movement.

The heater can, if necessary be connected to a bulk storage tank.

| Type | | KA 230 | KA 400 |
|--------------------------|-------------------|---------------|---------------|
| Max. Heat output | kW | 66,0 | 115,3 |
| | Kcal/h | 56.739 | 99.129 |
| | BTU | 226.954 | 396.517 |
| Air Volume | m ³ /h | 2.800 | 4.800 |
| Rated Power | W | 460 | 800 |
| Running Current | Amp. | 3,0 | 6,0 |
| Oil Consumption | litre/h | 6,1 | 10,6 |
| Tank Capacity | litre | 51 | 100 |
| Electrical Supply | | 230 V - 50 Hz | 230 V - 50 Hz |
| Weight w/o fuel | kg | 65 | 101 |
| Length | mm | 1.405 | 1.680 |
| Width | mm | 620 | 690 |
| Height | mm | 750 | 898 |
